2010	89.8		2011	95.2	80.9
2011	95.2				
STATE AVERAGE	79.3				

Summary:

The main data point that sticks out is how much higher our scores are than the state average. Not only were our scores the highest they have ever been, but the gap between us and the state averages also widened. Keep in mind that the state averages increased as well. Our combined average score for all subjects was more than 14% higher than the state average. What does this mean? It means that our kids are improving at a faster rate than the rest of the state!
